

CueServer™

A whole new way to think about stand-alone lighting control.

The lighting system integrator's dream machine...

- Fully integrated lighting, show control and user interface server
- All setup, programming and operation via built-in web server
- Simultaneously handles static and streaming DMX playback
- Real-Time, astronomical and 365-day calendar events
- Scripting language event model
- Ethernet, RS-232, Digital I/O, MIDI and DMX-512 all onboard
- Front panel LCD display and programmable function buttons
